- white
- short safety end rail: white
- Jolla extra safety rail: white
- Norppa extra safety rail: white, blue, red
- Puskuri pads in Muurame standard fabric or fabric of your choice

Muurame children's beds

Materials

- painted furniture board
- sides in birch of the Milla crib are solid birch
- bases in birch plywood; Milla 6 mm, Jolla 6.5 mm, Jungmanni 9 mm
- bunk bed rungs: painted 16 mm tube
- Curtain pole: 20 mm metal tube
- Puskuri pad stuffing: U-shaped foam plastic, hardness P50, on top 150 g wadding.

Surface treatment

- 3-component catalyzed paint, special characteristic non-yellowing*
- rungs and curtain pole powder painted

Care instructions

- Wipe using a neutral (pH 6-8) cleaning liquid (e.g. washing up liquid) on a damp cloth after which the surface should be dried
- dark marks caused by sharp objects (e.g. rings, watches) on surfaces coated with white catalyzed paint (color 00) can usually be removed either using an eraser, a cloth soaked in a mild detergent or with a damp sponge, e.g. Vileda Miraclean or equivalent.

The Muurame bunk bed is tested by the Technical Research Centre of Finland (VTT) and checked by the Finnish Consumer Agency. When fitted with safety rails (2+2) it meets all the safety requirements of EN-747-1

Board materials formaldehyde class E1

We retain the right to make changes.

MDF: Medium Density Fiber Board (Raw material dense-grained softwood chips and sawdust, density 690 kg/m³) HDF: High Density Fiber Board (Raw material dense-grained softwood and sawdust, density 900 kg/m³) Furniture board: P2 strength class (EN312 standard, classification P1-P7), raw materials wood chips and sawdust

* The strength of the paint used by Muurame is its excellent ability to prevent yellowing, i.e. the surface remains pure white for an exceptionally long time despite exposure to sunlight. However, the stronger the surface required, the harder it is to prevent yellowing. The type of paint used seeks to obtain an optimum result regarding preventing yellowing and surface hardness.
